

Drawing/Painting
Courses

Ceramics/Sculpture
Courses

Creative
Photography

Drawing and Painting students will develop an understanding and appreciation of art through the study of elements and principles of design. Students will explore their personal artistry using both wet and dry media, subject matter and content.

Ceramics and Sculpture courses introduce the principles and elements of design through traditional hand-building techniques, decorative surfaces, three dimensional construction in other media.

Creative Photography incorporates the elements and principles of design. Students will create photographic techniques, digital, pin-hole and SLR cameras and dark room black and white processing.
